

Nokia 3250 XpressMusic

Twist to the music

Get a fresh take on the Nokia 3250 Xpress music phone. One twist of the wrist and it becomes a music player with memory expandable up to 2 GB for up to 1500 songs. Twist again and it's a 2-megapixel camera. Snap in landscape or portrait mode and get up close with the 4x zoom. Twist back and it's a smartphone. Take calls on five continents, browse over EDGE, and get creative with all the imaging and music software packed inside.

Features at a glance

- Twist to access phone, camera, or music functions instantly
- Play tracks and create playlists with the music player (MP3/eAAC+)
- Store up to 1,500* songs

*2GB memory card sold separately

- Share playlists with your friends over Bluetooth, MMS, or email
- Integrated 2-megapixel digital camera
- Turn and capture still photos or video in a single twist
- Share and publish your mobile memories via blogging

- Visual Radio

Nokia Music Manager 1.0

With Nokia Music Manager 1.0, you can create and organize digital music files on a compatible PC and transfer them to your Nokia 3250 XpressMusic phone.

Basic functions:

- Transfer AAC, eAAC+, WMA, and MP3 tracks from Music Manager to your phone
- Save CD music tracks to eAAC+ format
- Play eAAC+, AAC, WMA, and MP3 music tracks
- Create, edit, and play M3U playlists
- Convert from MP3, WMA into AAC/eAAC+ format
- Organize music tracks and playlists in the Nokia Music Manager
- Play audio CDs
- Supports all Nokia music devices
- Supports Windows2000, XP, and Vista
- With Nokia Music Manager Music Studio you can organize and copy audio tracks onto your phone.
- Music can be placed into the program from any Windows folder.

The CD player allows you to save CD audio files in AAC digital format, which may then be transferred to your phone.

Note: The Nokia 3250 XpressMusic phone is also compatible with Windows Media Player.

How to transfer music

With Nokia Music Manager you can transfer music tracks to your phone from a CD. You first save music from a CD on the PC and then transfer the tracks from Music Manager to the phone.

Use a USB cable (DKU-2 or CA-53) connection to transfer large files such as music files between your phone and the PC quicker than with other connection types.

To transfer music from a CD to your phone

- Transfer from CD
 - Insert your music CD in the CD or DVD drive on your PC.
 - The tracks are listed in the CD view. If online, the metadata for the tracks is fetched automatically. If offline, input data manually.
- Transfer from PC to phone
 - Connect your phone and PC with the USB cable and then select PC Suite.
 - Select Scan for Music Files. Select the wanted tracks from the UI using your mouse and then click the Copy to Phone icon.

Camera

- Integrated 2-megapixel digital camera (1600 x 1200 default image size)
- Twist and capture still photos or video in a single twist
- Advanced camera modes: still, burst, video
- Options for night, brightness adjustment, image quality, and self-timer

- 4x digital zoom
- Video resolution: 176x144 or 128x96 pixels (QCIF or SubQCIF), 15 frames per second
- Video services: video capture up to 1 hour with microSD card, download, view, streaming
- Music keys double as camera controls: zoom in and out, shutter key, stop

Multimedia

- Watch your videos or stream music video from network using RealOne player
- Enhanced video editor: Edit your videos with master set of different effects and options and create new views with your own video content

Memory Functions

- MicroSD hot swap memory card reader with support for up to 2 GB memory (available separately)
- Up to 5MB free internal user memory

Mobile Blogging

- Share and publish your mobile memories via blogging
- Upload content to Web or just attach the content to your email or MMS
- Send your content via MMS or directly to friends locally over Bluetooth wireless technology

Messaging

- MMS OMA 1.2: Combine image, video, text, and voice clips and send as an MMS to a compatible phone or PC; use MMS to tell your story with a multi-slide presentation. The MMS OMA 1.2 specification allows you to send/receive messages up to 300 kB in size.
- Text messaging: Supports concatenated SMS, picture messaging, SMS distribution list
- Predictive text input: Support for all major languages in Europe and Asia-Pacific
- Email: Access your work and private email accounts; supports SMTP, POP3, and IMAP4 protocols
- Presence: Includes Wireless Village, Instant Messaging, and Dynamic phonebook; know someone's status before you call

Memory Functions

- 10 MB internal memory plus expandable memory up to 2GB for 1,500 songs with microSD card*
