Nokia Point & Find^{BETA}

**In the know,
on the go**

Discovery on demand – information when you need it

Nokia Point & Find is a new way for you to find and connect to relevant information and services by simply pointing your internet-enabled camera phone at real life objects. Easily, intuitively and on the spot. Nokia Point & Find puts you in the know, when you're on the go.

Connecting the physical and digital worlds

Just point your camera phone at real life objects and find a world of content just when you need it. For example, point your camera phone at a movie poster and instantly see local showtimes, reviews, trailers – even purchase tickets with just a few clicks.* Nokia Point & Find also supports text-entry search with directory capabilities.

With Nokia Point & Find, shoppers can also point at barcodes of retail products to obtain price information and comparisons

Download the Nokia Point & Find application to your internet-enabled camera phone at pointandfind.nokia.com

1. Point

Point your phone at real life objects, like this movie poster.

2. Find

Find what you are looking for, like local showtimes. And more. Relevant and useful content delivered to your phone instantly and easily.

* Ticket purchase function available in U.S. at launch
