

Nokia in brief

Nokia is the world's number one manufacturer of mobile devices by market share and a leader in the converging Internet and communications industries. We make a wide range of devices for all major consumer segments and offer Internet services that enable people to experience music, maps, media, messaging and games. We also provide comprehensive digital map information through NAVTEQ and equipment, solutions and services for communications networks through Nokia Siemens Networks

Nokia organization

- *Devices* is responsible for developing and managing our mobile device portfolio, including the sourcing of components
- *Services* is responsible for developing consumer Internet services in five areas—music, maps, media, messaging and games—and working to deliver those services in an easily accessible manner to consumers
- *Markets* is responsible for the management of our supply chains, sales channels, brand and marketing activities
- The *Corporate Development Office* gives operational support to the units and explores corporate strategic and future growth opportunities

Nokia Siemens Networks provides wireless and fixed network infrastructure, communications and networks service platforms, as well as professional services to operators and service providers.

NAVTEQ is a leading provider of comprehensive digital map data for automotive navigation systems, mobile navigation devices, Internet-based mapping applications, and government and business solutions. NAVTEQ's map data will be an important part of the Nokia Maps service that brings downloadable maps, voice-guided navigation and other context-aware web services to people's pockets.
