

Nokia's Environmental Policy

Basic Principles

1. A successful business requires a solid, product life cycle based environmental performance.
2. The Nokia Way means an active, open and ethically sound approach to environmental protection.
3. The objective of Nokia's environmental policy is sustainable development in accordance with the [International Chamber of Commerce \(ICC\) business charter](#).

Implementation

1. The environmental policy is an integral part of general management process.
2. Line organizations plan and implement the action programs by using environmental specialists and the best available technology.
3. The action programs are based on a thorough understanding of the environmental impacts of a product throughout its life cycle.
4. Minimizing the environmental impacts requires continuous efforts and follow-up of the results; it is thereby a part of the total improvement activities.
