

Ovi by Nokia

Ovi, the consumer brand for Nokia internet services, brings together your online world, your mobile device and your computer into an easy to use and consistent experience. With Ovi you can easily manage, sync and share your personal files or information, as well as access Nokia services in media sharing, maps, games, music and messaging.

Contacts & Calendar

- Once you've signed up for a Nokia Account and registered your Nokia device on Ovi.com, you can immediately sync and store your device contacts, calendar, notes and tasks online.
- This free functionality creates an online backup of your important information that you can access and edit anytime when connected to the internet.

Share

- Ovi offers a free media-sharing service where you can store an unlimited amount of photos, videos and other media types.
- It's easy to upload, share and reuse your personal media through your Nokia device (using the Share Online client), your computer and other connected devices.
- You maintain control over your content and can set appropriate privacy levels (i.e. who can view, comment on or tag your media.)

Maps

- Ovi extends the Nokia Maps experience from the device to the desktop.
- You can pre-plan your journey at home on your computer and then synchronize it to your mobile device.
- The service will become a destination for you to save and organize places, pre-plan trips and post-edit them.
- You will also be able to share your location and all your personally and socially meaningful content with friends by inviting them to join your activities and experiences.

Games

- Through Ovi you can access Nokia's mobile games service, N-Gage, which brings you exceptional, made-for-mobile gaming.
- You can download best-in-class titles from top publishers to your device or compatible PC; try any game before you buy the ones you want; track and share your scores; and play games with friends.

Music

- Through Ovi you can access the Nokia Music Store, where you can browse, download, stream and sync music to your PC, or download it directly to your mobile device.
- Now live in 12 markets, the Nokia Music Store offers you millions of tracks from both major and independent labels; international and local artists.

Mail

- Ovi offers you a mail service with 1GB of storage space and filters to block spam emails.
- Web access is expected to be available through Ovi.com in the first quarter of 2009.

Files

- With Ovi you can remotely access, use and send files stored on your internet-connected PCs from any internet-connected mobile device, PC or Mac.
- When your PCs are turned off you can still access selected files because the service automatically synchronizes them into an online secure digital locker.
