

Designed for the way we work.

Nokia Eseries devices
for smarter business mobility

NOKIA
Connecting People

How we respond is who we are.

Nokia Eseries – optimised for business

The ability of your business to adapt to new, increasingly mobile ways of working could be what sets you apart from the competition. When you're on the move, Nokia Eseries devices provide you with freedom, flexibility and power to collaborate, wherever your work takes you.

Delivering efficiency and productivity, business-optimised Nokia Eseries devices add value to your chosen mobility solution. Designed with people in mind, they're also stylish and comfortable in your hand, easy to master and include many time-saving features. Plus, they safeguard your personal and business information, are renowned for reliability and are simple to deploy, manage and upgrade.

See how Nokia Eseries devices can help to maximise the potential of your business.

Email and instant messaging

Nokia Eseries devices support an array of email and messaging options, including Mail for Exchange (Microsoft ActiveSync), IBM® Lotus Notes® Traveler, Instant Messaging (IM/Chat), Presence, Multimedia Messaging Service (MMS), and Short Message Service (SMS).

Essential office applications

Nokia Eseries devices have in-built mobile VPN to give you access to your corporate intranet and network applications, such as enterprise resource planning (ERP), customer relationship management (CRM) and sales force automation (SFA). Plus, you can read, create, edit and print Microsoft Office documents, spreadsheets and presentations with Quickoffice application. You can also view and edit* PDF documents.

Calendar and organiser utilities

Advanced and optimised calendar functions, contacts and to-do lists can all be synchronised with common business email solutions traditionally used on PC. Viewing and making calendar appointments is now even easier with the new Nokia Eseries interface offering you month, week or day views. Pop-up windows show you more information at a glance.

Security and data protection

Get the protection that your business demands with in-built security features such as hardware accelerated device and memory card encryption, device locking and remote wiping.

Device management solutions

Nokia Eseries devices are compatible with most device management providers for over-the-air management, delivering lower support costs and enhancing the usability of mobile software. Additionally, Microsoft® Exchange offers you the possibility to create and manage security policies over the Microsoft® Exchange ActiveSync protocol.

Advanced voice technologies

Superior voice clarity is paramount, so noise cancellation is especially useful in busy surroundings. Other advances to help you meet your business goals include: Call Connect (integrates Eseries devices with your fixed telephony system), handsfree speakerphone, voice dialling, conference calling, and a host of call handling and call management features.

Stylish and functional designs

Contemporary designs and different form factors to suit the variety of ways that people work. So you'll enjoy a choice of screen size, navigation options including Navi™ key, and keymat layout – for instance the fast and convenient QWERTY. Nokia Eseries devices are also elegantly created in tactile and stylish materials that make them comfortable in your hand and easy to use.

High-performance business tools

Business-level performance features include long battery life, fast processing speeds and generous built-in memory with expandable data storage up to 16GB on miniSD and microSD cards.

Extensive connectivity options

The full connectivity suite includes WLAN/Wi-Fi, Bluetooth® wireless technology, infrared, 3G, GPRS/EDGE, and USB data cables.

*feature is device specific

Things to consider when choosing the mobile device that's best for you:

- What volume and types of data will be accessed?
- What types of information will I be viewing on the device screen?
- What applications do I need on the device?
- What connectivity options do I require?
- What features will satisfy the people using the devices?

Mail for Exchange for Nokia devices

Mail for Exchange software is already integrated on Nokia Eseries devices making it a simple and secure way of deploying business-grade email.

Using the Microsoft® Exchange ActiveSync protocol, it allows your business to easily mobilise Microsoft Exchange email, calendar, contacts, and tasks. A cost-effective direct access mobility solution, it extends the capabilities of a desktop or laptop to your Nokia Eseries device.

Nokia Eseries – key device features

Nokia Eseries devices are designed for the increasingly connected business world, where a comprehensive range of requirements, challenges and demands need to be met.

Nokia E72

Boost your work

Nokia E72 is a high-performance device with comprehensive push email support, a high-quality 5 megapixel camera and intuitive optical Navi™ key. You can be more responsive with the full QWERTY keypad, whether it's a quick text or you're composing a longer email.

Store photos, music, videos and other data with 240 MB internal memory and up to 16 GB memory card.

Get desktop-like, business-grade email at your fingertips with integrated Mail for Exchange or IBM® Lotus Notes® Traveler.

Message indicator light located in the Navi™ key so you know immediately when you have new email, SMS or MMS messages.

Noise cancellation ensures superior voice call clarity, which can be particularly useful when you're travelling and in a busy, urban area.

The streamlined interface and optical Navi™ key mean you'll navigate conveniently, intuitively and easily to every device feature.

Capture high resolution images and video using the 5 megapixel camera with flash and autofocus, plus an additional front camera for video calling.

Easy set-up and a full keyboard, auto-completion, auto-correction and learning capability for fast and easy typing.

Nokia E75

Mobile email made easy

Manage your business and your personal life on the move with Nokia E75. It brings email, messaging, document viewing and web browsing together. The side-slide QWERTY keyboard makes writing messages easy, while the sleek, ergonomic and robust design is perfect for business and personal use.

Keep work and leisure in balance with effortless switching between business and private modes.

Find your way wherever you are with built-in GPS receiver, and support for assisted GPS (A-GPS) and integrated Nokia Maps application.

Browse the web, travel with Nokia Maps and download music and videos.

Save time with easy email set-up and intelligent text input, such as auto-completion, auto-correction and learning capability.

Messaging on-the-go is made simple and intuitive with the side-slide QWERTY keyboard.

Nokia E52

Email with ease

Nokia E52 provides secure, business-grade email at your fingertips and with exceptional battery life you can stay connected for longer whether you are at home, at work or travelling. Enjoy high-quality voice calling with noise cancellation, plus fast data connection, multi-tasking capability and a large, clear screen in a stylish and slim design.

Supports multiple email applications including Mail for Exchange (Microsoft ActiveSync) and IBM® Lotus Notes® Traveler.

Stay organised with advanced calendar and contacts functionality and keep work time separate from free time with the Business and Personal Homescreen modes.

Keep in contact with customers and colleagues by adding desk phone capabilities to your device via Nokia Call Connect.

Large, high-resolution, 16-million colour display for easy viewing of email, attachments and web browsing Experience email.
