

Mail for Exchange

Service description:

Mail for Exchange for Nokia devices is a mobile email solution that enables wireless synchronization of email, calendar, and contact data between Microsoft Exchange Server and Nokia devices.

Now, Movistar and Mail for Exchange will help you stay connected in an affordable way.

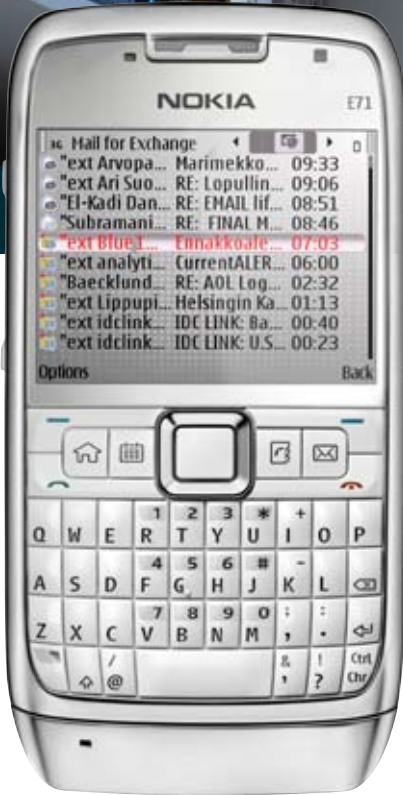

Key advantages:

- No additional hardware, software or licenses required. With Nokia's Mail for Exchange now you can mobilize your entire workforce without any additional infrastructure.
- Nokia offers the widest range of devices in market to date. Attractive, durable devices for professional, easy usage. Allowing you to choose a style that reflects your own and fits your business needs.
- Contacts on demand. All contacts in your company, in your device with Global Address Look Up. No tens of thousands of contacts to store and update; we simply link to the server.

How does it work?

- Mail for Exchange allows Nokia devices to connect directly to your corporate Microsoft Exchange server without additional hardware, software or licensing fees.
- Mail for Exchange uses direct push technology and encrypted HTTPS connections that allow consistent, seamless and secure access to your email.
- In addition, thanks to the Microsoft Exchange ActiveSync protocol you can increase security levels for your workforce at any time.
