

5G immersive experiences for enterprise.

Create safer and efficient operations through connected visual intelligence.

Opportunities for enterprise

- Reduce training time for new employees
- Improve the quality of processes with AR guided assistance
- Remote expert based AR for faster problem resolution
- Enhance remote team collaboration

Opportunities for CSPs

- Higher-value bundled device, software and connectivity packages
- Tiered connectivity services for AR/VR

5G connectivity supporting

- Higher capacity for better video resolutions
- Lower latency for improved user experience
- Seamless indoor & outdoor service continuity at scale
- Capability to create guaranteed levels of services using network slicing
- Increased data security

80-90%

barriers to adoption predicted to be solved by a single bundled solution/service
