

5G-enabled cloud robotics for enterprise.

With many prepared to invest in 5G for cloud robotics, CSPs will see a high demand for cloud solutions.

Opportunities for enterprise

- Enhanced process automation
- Meet demand with faster, flexible and dynamic production lines
- Reduce human error within quality control

Opportunities for CSPs

- High demand for private networks and spectrum services
- New customers requiring smart manufacturing and industrial automation

Made possible by

- Network slicing
- Edge computing
- Private wireless networks
- Video analytics
- Time sensitive networking

62% of automotive industries find 5G for cloud robotics appealing
