

5G video applications for consumers.

With video already popular among consumers, CSPs have plenty of 5G benefits to emphasize for video capture and detection.

Opportunities for consumers

- Video calling and telepresence for virtual collaboration
- Live-streaming /broadcast on social media
- Home monitoring/perimeter surveillance for safety and security

Opportunities for CSPs

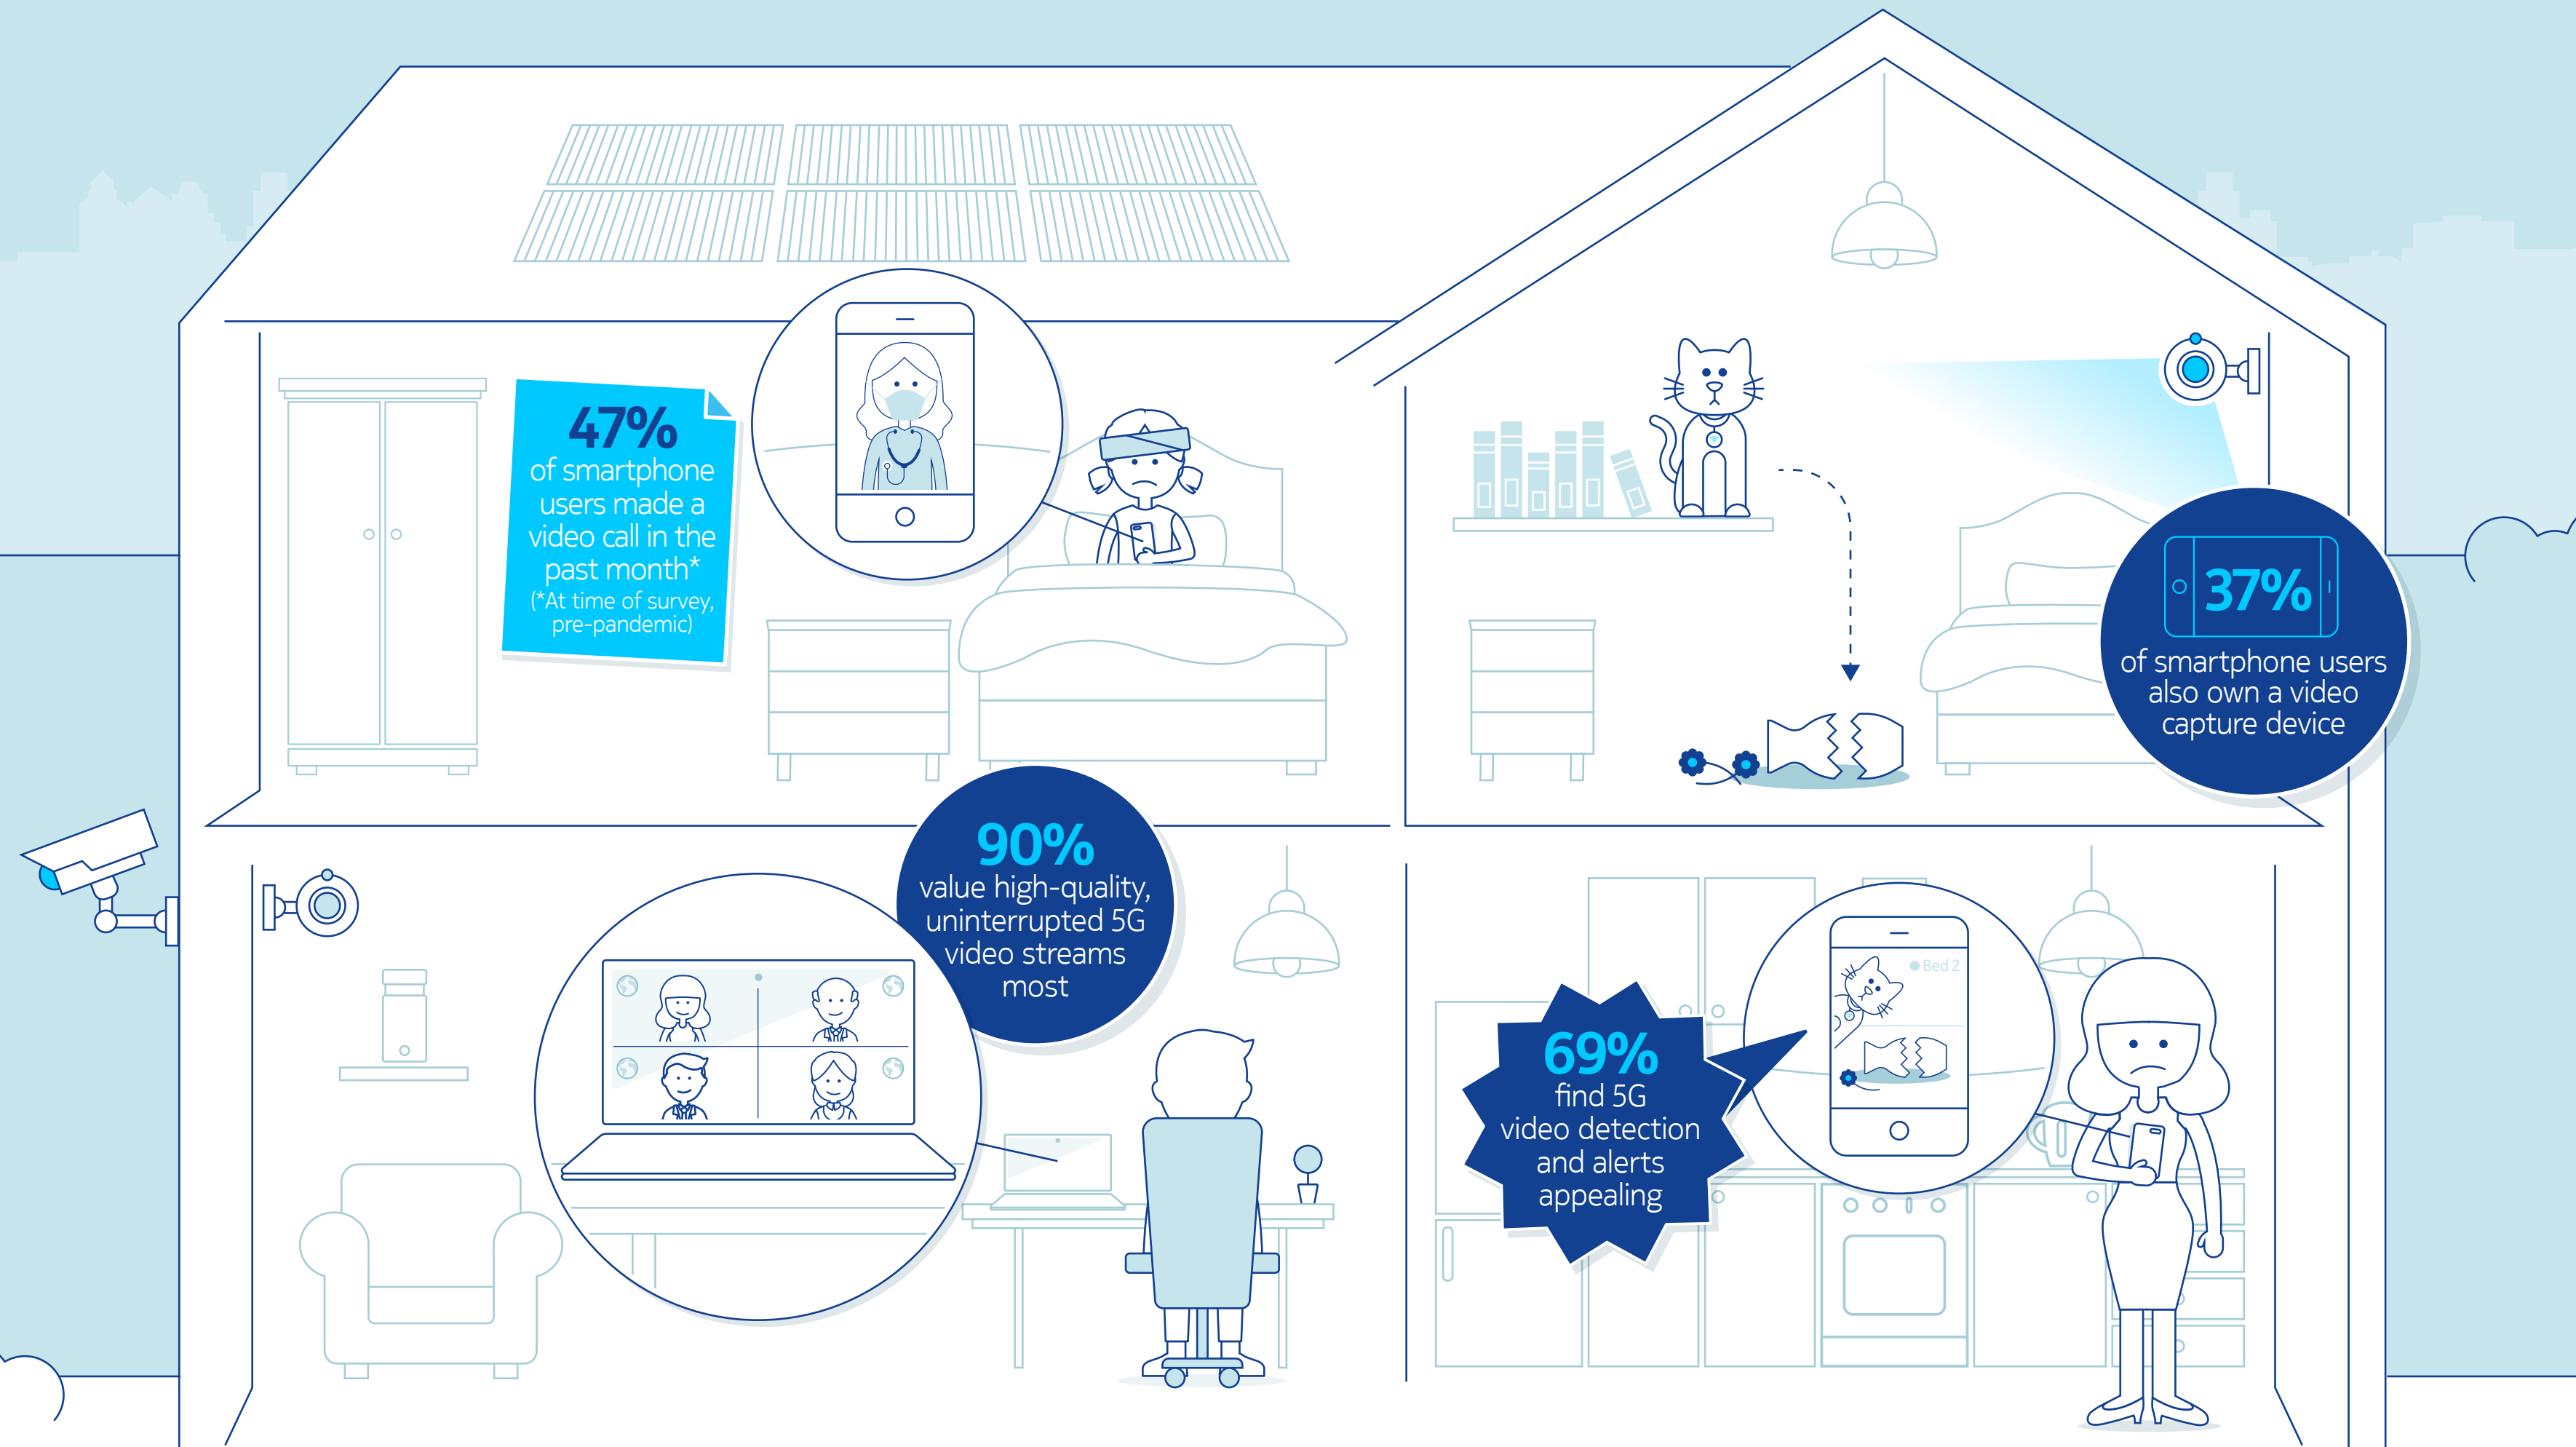

- CSPs can sell 5G-enabled, end-to-end video surveillance, video broadcast and telepresence solutions to consumers
- Direct to consumer model through the CSPs' retail footprint or via channel partners
- "as a Service" solutions can be sold for an upfront fee plus a monthly subscription fee to operate and support the system

Connectivity made possible by

- 5G eMBB
- Edge computing
- Video analytics
- Endpoint security

90%

rated high-quality, uninterrupted video streams as valuable 5G benefit
