

Nokia VitalSuite Performance Management Software Premier Service

Helping IT professionals optimize network maintenance

In today's competitive marketplace, IT professionals are facing growing demands to manage increasingly complex networks. IT managers are looking for ways to reduce the time and expense of performing routine maintenance tasks so that their valuable IT resources can focus on optimizing network and application performance.

With the Nokia Premier Service for VitalSuite® Performance Management software, Nokia Professional Services teams take responsibility for time-consuming tasks such as software installation, initial configuration, server maintenance, problem diagnosis and software updates. The Premier Service is available for all VitalSuite Performance Management software products as an enhancement to the Support and Subscription Service.

The service defined

The VitalSuite® Performance Management Software Premier Service helps IT maintenance staff to manage daily activities by providing a comprehensive range of capabilities:

- Architecture and deployment: Hardware server architecture, sizing and deployment services to ensure optimal product function
- Integration, configuration and training
 - Software integration, including operating system, database, utilities and all VitalSuite software products
 - Sophisticated alarm and notification configuration so engineers can be proactive in identifying potential problem areas prior to system outage
 - Quick-start training and data interpretation that enables customers to be productive on day one

- Routine maintenance
 - Quarterly health checks and maintenance to review operation and performance
 - Check-up reports that include technical recommendations and system status snapshots
 - Partnering with the customer to communicate enhancement requests to product and support teams

Nokia offers two levels of the Premier Service, based on customer needs:

- Premier Plus Service: A complete package that includes Nokia supplied hardware, server operating systems, software tools and their maintenance and licensing agreements, and no-hassle support
- Premier Service: Allows for customers to provide the hardware, server operating systems, software tools and their maintenance and licensing agreements

Additional Professional Services include architecture consulting, product training, and Nokia MIBWorks and Transact Toolkit custom development.

Win-Win

The VitalSuite Performance Management Software Premier Service helps IT maintenance staff by managing daily tasks. Nokia Premier Service engineers provide comprehensive architecture and deployment; integration, configuration and training; and routine maintenance support. The results are decreased risks, lower costs, and the increased availability of IT resources to focus on optimizing their networks.

Value proposition of the Nokia VitalSuite Performance Management Premier Service

- Staged and verified solution: Secure, tested design of the solution implementation prior to delivery, helping to decrease the risks associated with implementation projects
- Increased customer focus: Performance management system integration so customers can focus resources on other business areas
- Reduced expenses: Lower costs for recruiting, training and retaining skilled engineers and technicians
- On-site software and hardware maintenance: On-site installation, upgrades and troubleshooting of hardware/software problems at the customer's data center, reducing customer travel expenses and resource demands

Partner with Nokia

The long-trusted partner of service providers, enterprises, strategic industries and governments around the world, Nokia is a leader in mobile, fixed, IP and optics technologies and a pioneer in applications and services. Nokia Professional Services experts are dedicated to developing, deploying, optimizing, operating, maintaining and managing global multivendor networks.

Nokia includes Bell Labs, one of the world's foremost centers of research and innovation in communications technology.
