

# Nokia Deepfield DDoS security solution

Automated mitigation in <30 seconds

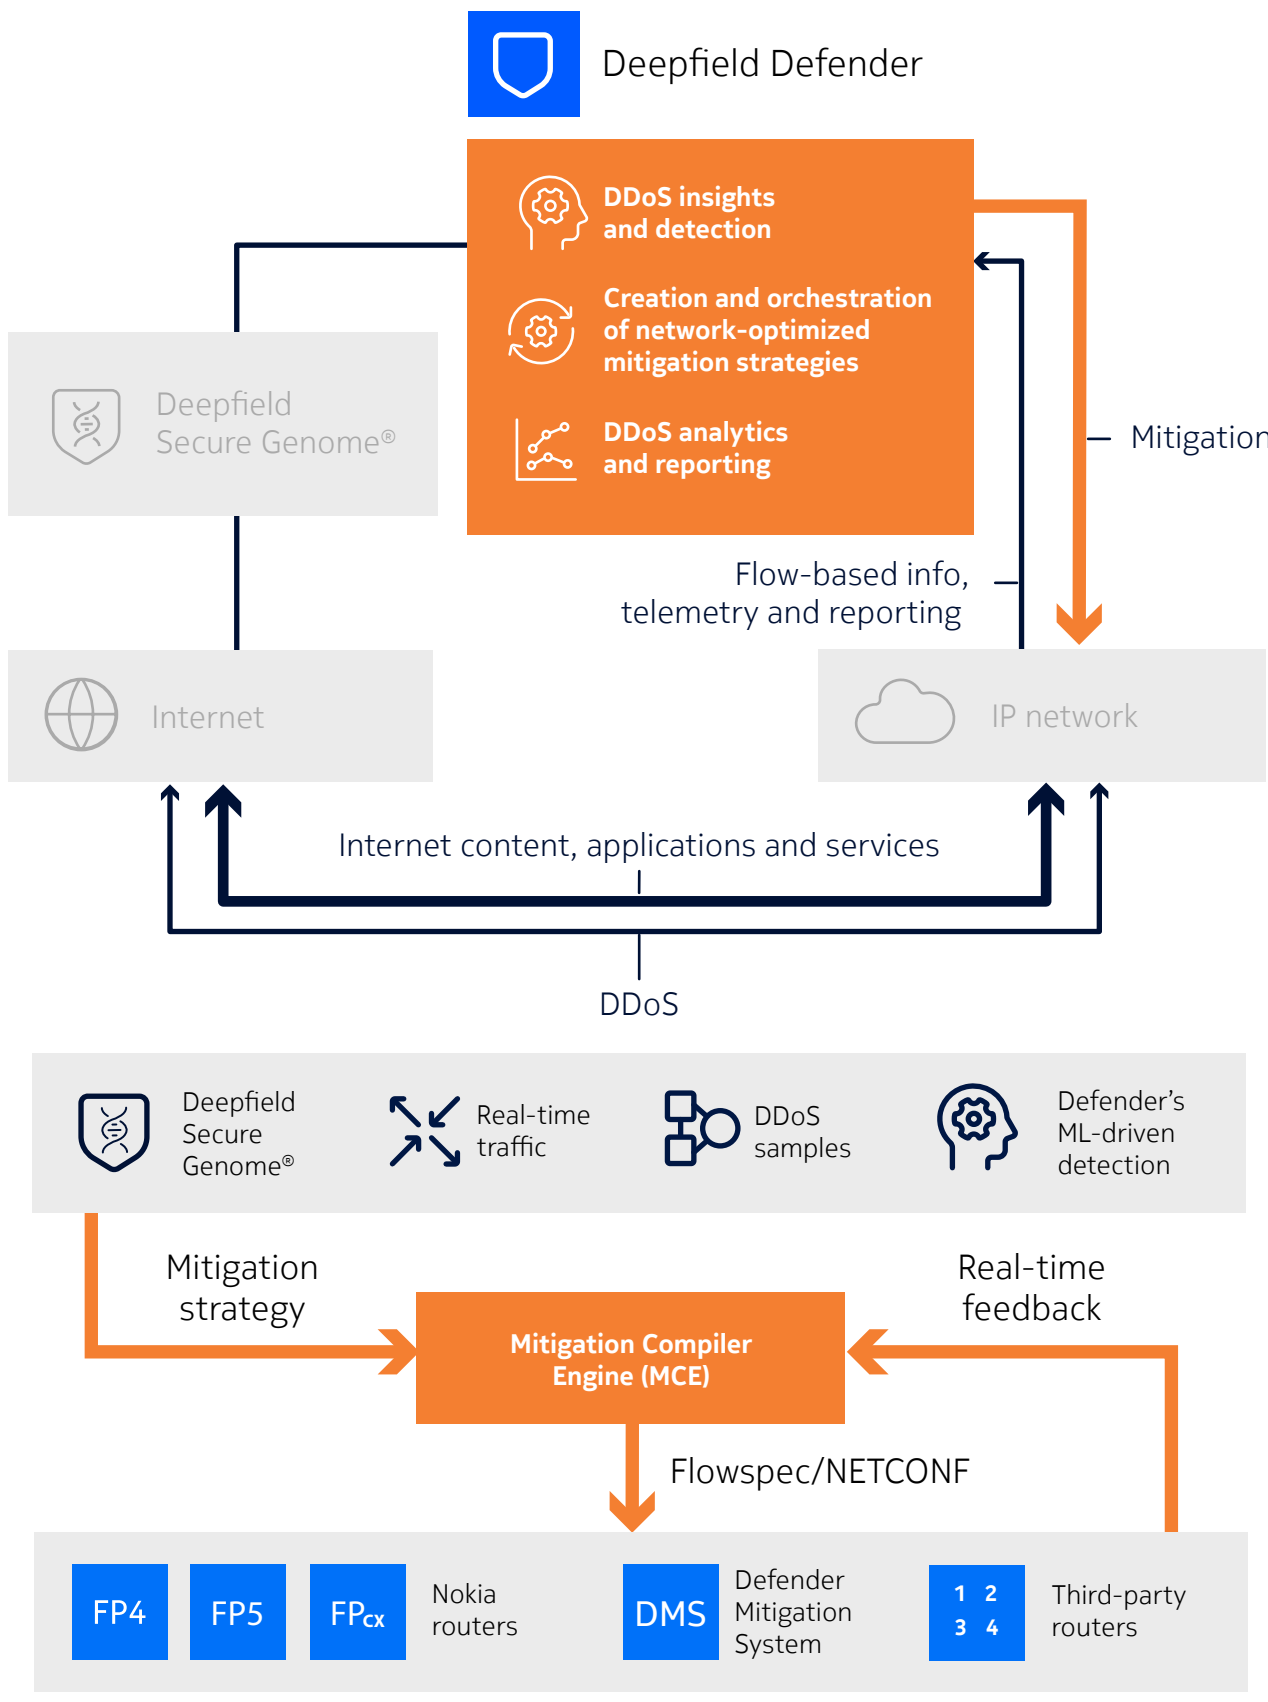

## Fast and accurate detection

**Deepfield Secure Genome®**  
Knowledge and up-to-date visibility into billions of IPv4 and IPv6 addresses on the internet

- DDoS vectors and details
- Known/open reflectors
- Botnets
- Booter and spoofed fingerprints
- Server software
- IoT device type details

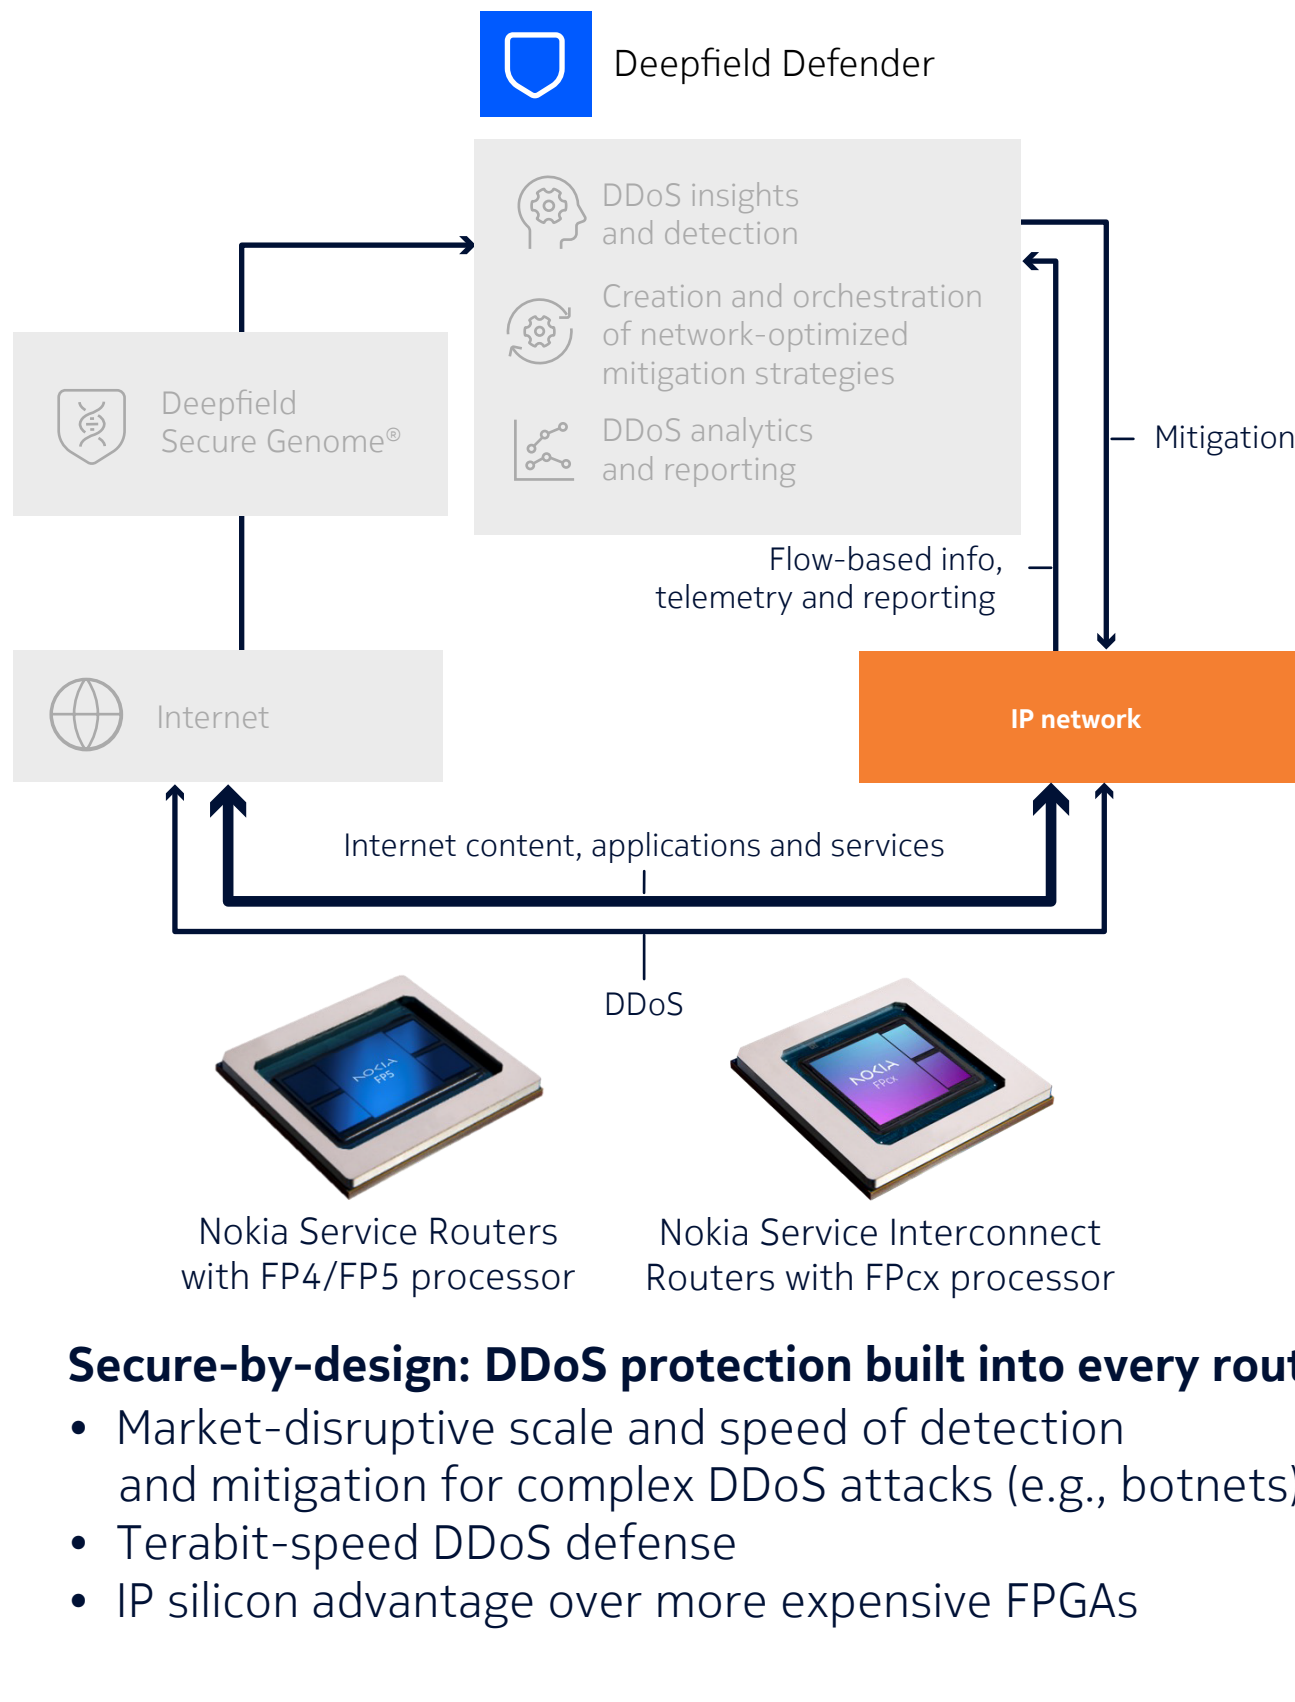

## AI/ML for network-optimized mitigation strategy

### Mitigation Compiler Engine

- Advanced AI/ML-based system for automatic generation of optimized mitigation strategies for complex DDoS attacks
- Trained on thousands of real-world DDoS attack samples
- Effective against well-known and emerging DDoS vectors

## Network-based mitigation

### Secure-by-design: DDoS protection built into every router

- Market-disruptive scale and speed of detection and mitigation for complex DDoS attacks (e.g., botnets)
- Terabit-speed DDoS defense
- IP silicon advantage over more expensive FPGAs

7750 Defender Mitigation System (7750 DMS-1-24D)

### New, purpose-built DDoS mitigation appliance

- Industry-leading scalability and cost efficiency
- FP5-based, 2.8 Tb/s 2RU system
- Optimized OS for DDoS mitigation
- Blocks all well-known and emerging DDoS
- Field-expandable for next-generation and future attacks

Select third-party routers

## Embrace a paradigm shift in DDoS protection with Nokia Deepfield Defender

Enable 360-degree protection for the whole network, all services and users

Detect and mitigate all modern (e.g., botnet DDoS) and future threats and attacks in less than 30 seconds

Automate your defense and extend your protection to many more customers

Offer managed security services to your customers
