

Create new horizons with network automation

Transform your IP network's operations inside and out with productive process automation

Unlock IP network KPI benefits:

Service fulfillment:

— Significant reduction in manual labor time required to create and activate new services

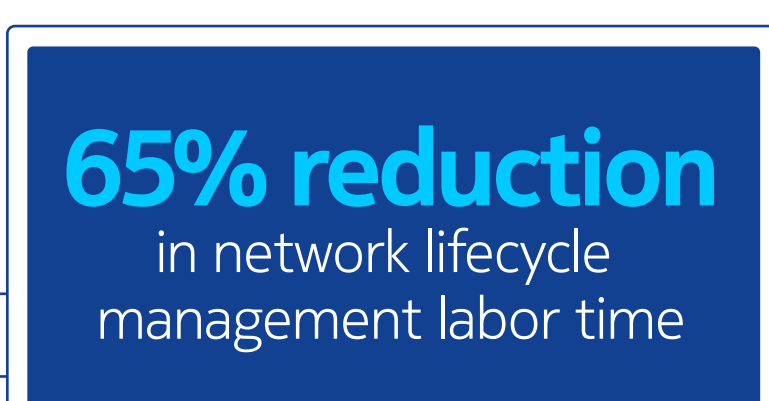

— Decrease order fallout by standardizing templates, scenarios, and customer journeys

+ Enhance the accuracy of deletion processes and reduce the need for equipment audits

Network lifecycle management:

— Significantly reduce manual workloads for the provisioning and upgrade of equipment

+ Automate network discovery processes and updates to router and interface configurations

Network and service assurance:

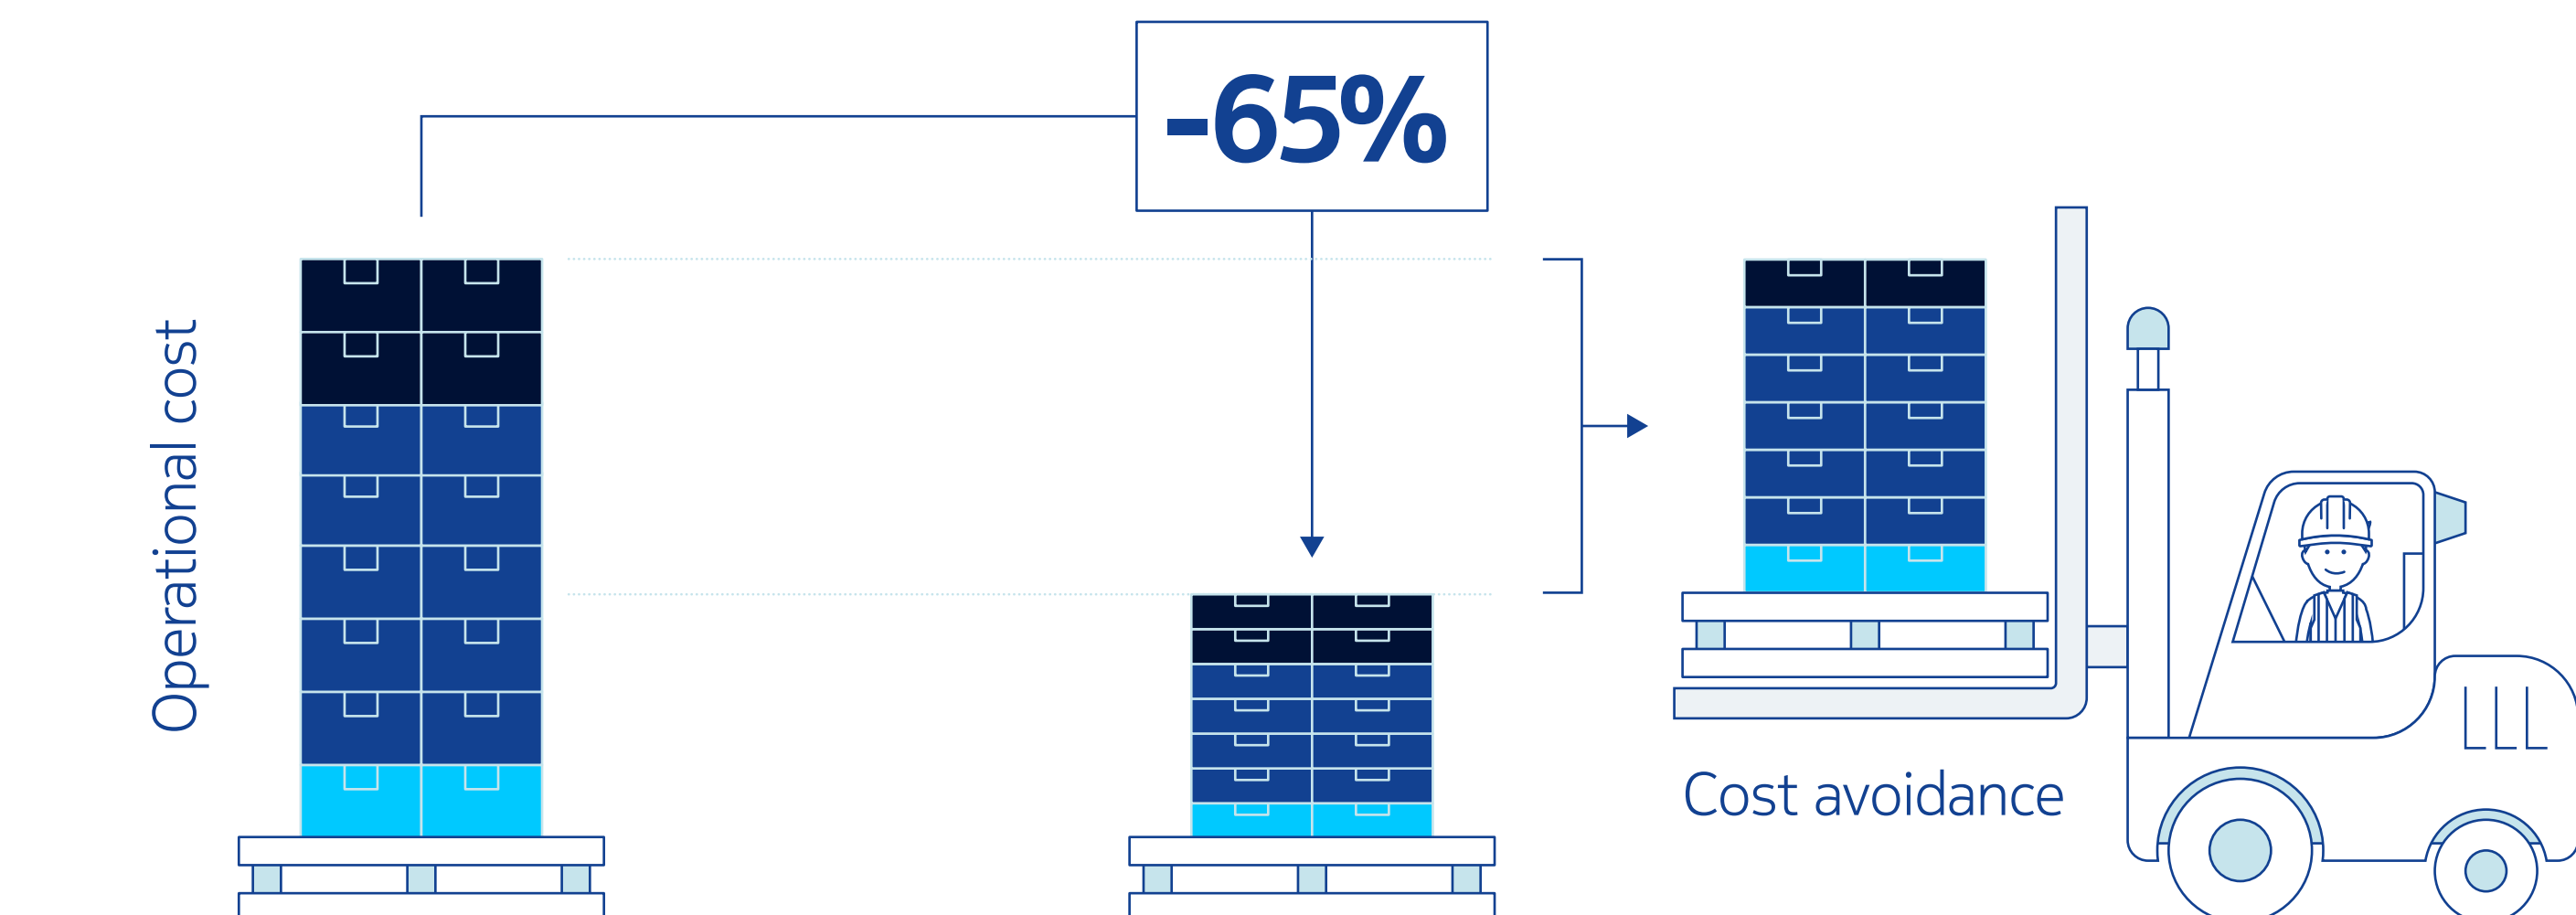

🔍 Identify, correlate, and resolve faults and alarms faster

📄 Significantly reduce the number of tickets requiring manual correlation

🎯 Troubleshoot and triage root cause issues quicker

Overall network automation:

■ Service fulfillment ■ Network lifecycle management ■ Network and service assurance
