

The background of the image is a server room with rows of server racks. The racks are filled with electronic equipment and have blue LED lights at the bottom. A large, white, stylized 'K' shape is overlaid on the right side of the image. The Nokia logo is in the top left corner.

NOKIA

Immersive experiences
that bring innovation
to life

Visit our Dallas Executive Experience Center
to explore the full range of Nokia solutions
for communications service providers,
enterprises, partners, and governments.

Whether you are a communications service provider (CSP), enterprise or Nokia partner, the EEC gives you a front-row seat for discovering the technology solutions that will help you move your business forward.

Introducing the Dallas Executive Experience Center

Located at our US headquarters in Dallas, Texas, the North American Executive Experience Center (EEC) is designed to give our customers and partners the opportunity to experience Nokia products and solutions through a series of live, immersive demos that bring innovation to life.

EEC fast facts

- Located at our US headquarters in Dallas, Texas
- Hosts around 100 customer and partner visits every year, over 2,500 visitors per year
- Immersive live demos of Nokia products and end-to-end solutions for communications services providers (CSPs), enterprises and partners
- Fully equipped with the latest productivity and collaboration tools
- Multiple meeting rooms that can accommodate groups of various sizes up to 70 people
- State-of-the-art audio visual equipment to support virtual and hybrid visits
- Includes the Enterprise Innovation Center, a proof-of-concept lab for testing and integration

Welcoming CSPs, enterprises and partners

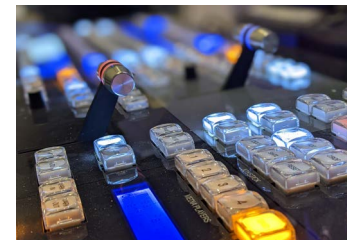

The EEC showcases Nokia Network Infrastructure products and solutions with live, hands-on demonstrations that illustrate the latest use cases. From Broadband networks to IP and optical networks, datacenter networks and industry-specific private wireless solutions, the EEC gives you the opportunity to experience the benefits of Nokia technology firsthand in a real-world network environment.

Work with our EEC architects to learn how we can help you capitalize on opportunities in your market and accelerate innovation, grow your revenue, speed time to market and advance your strategic initiatives. Deep dive into your technology areas of interest and engage with our global subject matter experts.

In-person,
virtual and hybrid
engagements
tailored to your
unique needs

Featuring a live, end-to-end Nokia network and equipped with the most advanced audio-visual equipment available, the EEC has the flexibility to accommodate your unique requirements. Whether you're looking to arrange an in-person, virtual or hybrid visit, our dedicated EEC architects can work with you to make it happen.

Visit the Enterprise Innovation Center

Collocated with our Executive Experience Center is the Nokia Enterprise Innovation Center (EIC). The EIC is a collaborative, proof-of-concept lab featuring award-winning enterprise technology from Nokia and our key partners that is integrated into a live communications network. This enables the integration and testing of different potential technology components that form an end-to-end network. Use-cases are developed and testing is executed to understand the performance and interaction of specific features and

situations across an entire solution and on specific components.

When you visit the EIC, you can leverage Nokia's experience to understand the specific benefits and challenges related to the different technologies and to help you make the right technology selections based on your specific needs. This will minimize the risk associated with implementing new technologies, and help you select technologies that provide the highest ROI.

NOKIA

About Nokia

At Nokia, we create technology that helps the world act together.

As a B2B technology innovation leader, we are pioneering networks that sense, think and act by leveraging our work across mobile, fixed and cloud networks. In addition, we create value with intellectual property and long-term research, led by the award-winning Nokia Bell Labs.

Service providers, enterprises and partners worldwide trust Nokia to deliver secure, reliable and sustainable networks today – and work with us to create the digital services and applications of the future.

Nokia is a registered trademark of Nokia Corporation. Other product and company names mentioned herein may be trademarks or trade names of their respective owners.
