## Intelligent automation of energy efficiency

Inject AI to counter growing energy consumption in ever more dense networks

## Nokia AVA Energy Efficiency

Applied Telco expertise:

↗ Multi-vendor
↗ Field-proven Al

↗ Flexible commercial models
 ↗ Modularity – pick and choose

↗ Energy OPEX savings<sup>®</sup> up to 20%

NOKIA

 $\nearrow$  Contribute to the global CO<sub>2</sub> emission reduction targets

## Learn how you can harness AI to establish more sustainable patterns of energy use: www.nokia.com/networks/services/NokiaAVA/energyefficiency

1) GSMA Intelligence estimates (2020); 2) Nokia forecast based on analysis of Western European CSP networks (2020) 3) Actual savings depend on network configuration, equipment, usage patterns and energy prices
