Metaverse Finland Ecosystem

This is a journey towards making Metaverse technologies accessible, safe and viable on a global scale.

Why?

The Metaverse is expected to be the next big technology platform worth 8 to 13 trillion € by 2030. The Finnish Metaverse Initiative, as published by Business Finland, comprises four key components: the Finnish Approach, the Finnish Vision, the Way to the Future, and the Recommendations and Actions. **The goal of the Metaverse Finland Ecosystem is to implement this strategy in practise.**

Working Groups

Industrial Metaverse

Enabling the use of Metaverse technologies across various industrial sectors such as manufacturing, maintenance, construction, defense, logistics, and transport.

Metaverse Health

Committed to enhancing the physical, mental, and social well-being of citizens through Metaverse technologies. This includes promoting inclusion and social wellbeing.

Metaverse Society

Dedicated to acquainting the Finnish society with the Metaverse. Educating the public about new developments and opportunities, supporting the policy framework for widespread adoption.
